Ketchum (MBKU) received a \$750,000 grant to support the improvement of academic and clinical technologies, scholarships to recruit new SCCO students, and equipment upgrades at the University of Los Angeles Regional Clinic. Grant, who is the largest private gift fund provided by the College's optometry, honors the SCCO graduate, Jonathan Smith, for his service as a trustee of the Donald W. Reynolds Foundation. The Foundation is a national charity founded in 1954 to support non-profit organizations and institutions that demonstrate effective financial management, effective work, program integrity and entrepreneurial spirit. MBKU President Kevin Alexander, Ph.D., says some of the money will be used to directly support the University Eye Center's enterprise and technology to enhance preclinical learning. Our third academic lecture hall on campus will soon be named after Dr. Jonathan Smith, after his service and in recognition of this precedent-setting contribution. Dr. Alexander said. The rest of the grant fund will be used to support scholarships. We are grateful to the Donald W. Reynolds Foundation for supporting our mission to educate today's minds for tomorrow's eyes, vision and health care and improving the educational and patient care experience, said SCCO Dean Stanley Wu, OD, MS, MBA. Page 2 Alerts! Latest updates Join COA - have a voice! Eye Help for the Public Media of the Coa Member News of the Member News Archive of the 2016 Archive on November 2016 COA is looking for patient examples to demonstrate to regulators that online eye tests, such as Opternative, are potentially harmful to patients. In particular, we need doctors to examples of patients who matched qualifications for the exam on the Opternative website, but who went to the optometrist instead and were diagnosed with a serious eye condition that were not found on the Opternative website. Optical qualifications require patients to be 1. 18-40 years old. 2. Have a recipe range that: Emmetropic myopic with spherical power between -0.25 and -5.50 Hyperopic with spherical power between 0.25 and 2.50 Astigmatic with cylinder power between Cyl -0.25 and -2.50 Non-Presbyopic 3. Do not have a history of amblyopia, diabetes, hypertension, glaucoma, cataracts, retinal detachment, traumatic brain injury, neurological problems, etc. 4. Do not have recent discomfort or symptoms of acute eye pain, flashes and/or floating in the eyes. If you prefer to print a form, click here. After filling out the form, please fax to COA at (916) 448-1423. The Western Regional Conference AOSA (WRC) is an annual event that complements the sisterly goals of optometry students in the Western United States through educational lectures as well as professional and social networks. WRC 2019 welcomes students from the Western University College of Optometry and the College of Optometry in Southern California, as well as the School of Optometry of the University of California at Berkeley and the College of Optometry of Arizona. Students have a rare opportunity to visit the host school, learn about current products on the market, and network with future colleagues. This year, SCCO AOSA is pleased to announce its partnership with the California Optometry Association (COA). COA represents more than 2,500 optometrists in the state, as well as more than 1,000 optometry students. Their mission is to support and promote the profession of optometry to ensure quality of care for all Californians. We are happy to mix and learn from them! We have an exciting and exciting vision for this conference and sincerely hope that you decide to be a part of it this year! Our theme will be technology and the future of our profession. Our link is to sign up just below! For more information, check out our website: wrc2019.weebly.com follow us on instagram @sccoasoas Thu, December 31, 10:00 AM CANCELLED (COVID19) - Chaffey College (Fontana Campus) - Work Expo 2020 18855 Merrill Ave, Fontana When you attend the School of Optometry in Southern California at the University of Marshall B. Ketchum, you step into a legacy of clinical and educational excellence that began as early as 1904 by our founder and namesake. You will also be part of a close-knit academic family, including a graduate group that is among the most experienced researchers, clinicians, and teachers of your chosen profession. We had a different name when Dr. Ketchum first opened our doors. But today, more than 100 years later, you will find the same high standards for scientists, clinical skills and professional development alive and thriving here on our beautiful Southern California campus. Learn more about the admissions process and requirements, as well as what it's like to be an MBKU student. Deadline 2021: years: 1, 2021 at 9:00 p.m. PST SCCO Admissions Brochure provides a brief overview of the Dr. Optometry Program at Marshall B. Ketchum University. This brochure provides potential applicants with useful information about various aspects of the program and admission process, such as the preliminary requirements and what the receiving team is looking for in the applicant's competition. Improving Optometry Career Across the Country by Marshall B. Ketchum University of Southern California College of Optometry boasts an impressive network of accommodations. The depth and breadth of his program, which focuses on exceptional resident training, is highly regarded throughout the country. The size, depth and width of SCCO residences are only a small part of what makes it remarkable. Individual residency programs themselves are unique in that they are designed to educate residents in the latest science-based theories and advanced clinical procedures adopted by SCCO and the American Optometry Association Guidelines, focusing on learning in inter-professional education and working together. Program settings range from Indian reservations to private practice and the Department of Veterans Affairs. Establish your career in health care with clinical and educational excellence. Explore the program by clicking on the links below. Doctor Optometry is a 4-year academic program that trains graduates to deliver modern eyes, vision and health care as an integral part of the primary care team. During the first year of study, students receive basic sciences and research methods. Courses in geometric and physical optics, biomedical sciences and visual sciences are included. First-grade students also begin basic eye exam skills starting in the first quarter. The second year highlights clinical methods and advanced research in the field of visual science. Students are starting to see their patients at Ketchum Healthcare in the second quarter of the second year. Third-year students have assignments in the care of patients in Ketchum Health under the supervision of the Faculty of Clinical History and prepare courses on contact lenses, vision therapy, eye pharmacology, clinical optometry and public health. The last year has been mainly spent on patient care in various institutions of the advocacy clinical program. Some Ketchum Health special service assignments are also included. View Summary of SCCO's 4-year clinical outreach program in the outreach clinical program has been in place since 1974 and provides fourth-year interns with three off-campus clinical rotations. Each rotation lasts from 10 to 12 weeks and is designed to enhance the clinical knowledge and knowledge of the intern. The program provides for various clinical conditions, including the Medical Centers of the Administration military bases, GMOs, Indian medical facilities, joint management centres and private practices. These sites are located throughout the United States, but in the western region of Arizona, California, Colorado, Hawaii, Nevada, New Mexico, Oregon, Texas, Utah and Washington. Propaganda sites are also available in Guam and Japan. Outreach Clinical Faculty are leading clinicians and serve as adjunct faculty members of the college. Map Locations We offer over 80 outreach sites, regionally, across the U.S. and abroad, each with their own patient demographic providing students with a unique fourth-year experience. Each rotation has a unique demographic situation. As students choose their own rotation locations, our outreach program allows them to tailor their fourth-year clinical experience to their professional interests. View a map of the clinical outreach locations of the NBEO Pass Rate National Council of Optometry exams are administered by the National Council of Experts in Optometry (NBEO) and are universally accepted for optometry licenses in the United States. For more information about NBEO, please visit their website.
